OBJECTIVE

AI & Data Science undergraduate who builds and ships working software rather than isolated coursework projects — database-backed platforms, full-stack web apps, and AI-integrated tools. Currently deepening MERN-stack fundamentals to move into production-grade full-stack web development.

EDUCATION

Hindusthan Institute of Technology

2024 – 2028

B.Tech, Artificial Intelligence and Data Science (Pursuing)

TECHNICAL SKILLS

Languages: Java, Python, C

Web & Frontend: HTML, CSS, JavaScript (basic), React.js

Backend & APIs: Node.js, Express.js, REST APIs

Databases: SQL, PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Vercel, Supabase

PROJECTS

Debugging Contest Platform (Test Portal)

- Built a full-stack contest platform for running live programming/debugging contests for ~70–80 participants, with separate student and admin authentication and role-based access.
- Implemented server-side code evaluation using the Judge0 API for automated debugging-contest judging, with a live contest timer and autosave to prevent lost submissions.
- Designed the contest data model (questions, submissions, results) in PostgreSQL via Supabase and built an admin dashboard for managing contests and reviewing results.
- Deployed the platform on Vercel.

Tech Stack: PostgreSQL, Supabase, Judge0 API, Vercel

CareerPilot AI

- Built a full-stack AI-assisted application connecting resumes and job descriptions, with a Spring Boot (Java 21) backend and a React frontend.
- Integrated Google Gemini via LangChain4j to power AI-driven resume and job-description analysis.
- Designed and implemented REST APIs to handle the resume–job-description matching workflow between frontend and backend.

Tech Stack: Spring Boot, Java 21, React, Gemini, LangChain4j, REST APIs

Smart Procurement Intelligence Platform

- Built a full-stack procurement workflow platform with farmer registration, slot booking, and role-based interfaces for multiple user types.
- Designed a transaction-safe slot-booking system in PostgreSQL using SELECT FOR UPDATE to prevent double-booking under concurrent requests.
- Implemented QR-code booking passes and tested backend APIs across procurement-center workflows.

Tech Stack: PostgreSQL, REST APIs

INTERNSHIPS

Artificial Intelligence Intern — Launched Global

Online

Web Development Intern — inAmigos Foundation

Online

CERTIFICATIONS

- Problem Solving Through Programming in C — NPTEL
- SQL — HackerRank
- Honours Diploma in Computer Application (HDCA) — Grade A; coursework: C, C++, Python, HTML5/CSS3, MySQL

PROBLEM SOLVING

LeetCode : 88 problems solved (66 Easy, 20 Medium, 2 Hard)
